Requirements Model

Package in package 'Model'

Requirements Model
Version Phase 1.0 Proposed
created on 21/10/2015. Last modified 19/11/2005

Requirements Model diagram

Custom diagram in package 'Requirements Model'

Requirements Model
Version 1.0
jhoni created on 21/10/2015. Last modified 21/10/2015

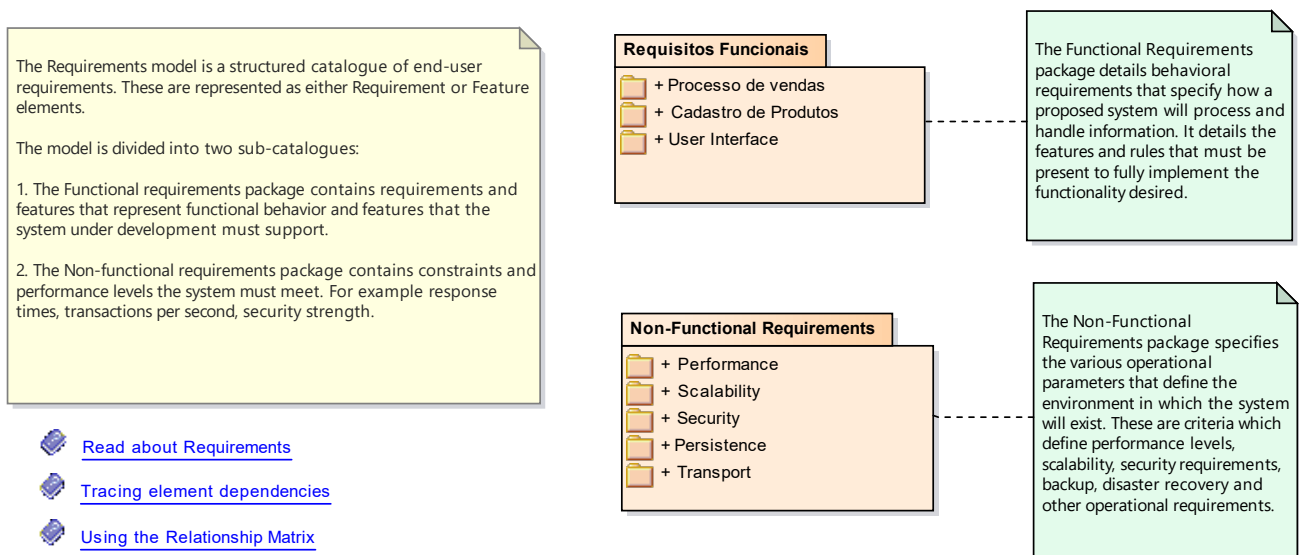

Figure 1: Requirements Model

<anonymous>

Note in package 'Requirements Model'

The Functional Requirements package details behavioral requirements that specify how a proposed system will process and handle information. It details the features and rules that must be present to fully implement the functionality desired.

<anonymous>
Version 1.0 Phase 1.0 Proposed
created on 21/10/2015. Last modified 21/10/2015
Extends

<anonymous>

Note in package 'Requirements Model'

The Non-Functional Requirements package specifies the various operational parameters that define the environment in which the system will exist. These are criteria which define performance levels, scalability, security requirements, backup, disaster recovery and other operational requirements.

Note

Note in package 'Requirements Model'

The Requirements model is a structured catalogue of end-user requirements. These are represented as either Requirement or Feature elements.

The model is divided into two sub-catalogues:

1. The Functional requirements package contains requirements and features that represent functional behavior and features that the system under development must support.
2. The Non-functional requirements package contains constraints and performance levels the system must meet. For example response times, transactions per second, security strength.

Version 1.0
jhoni created on 21/10/2015. Last modified 21/10/2015

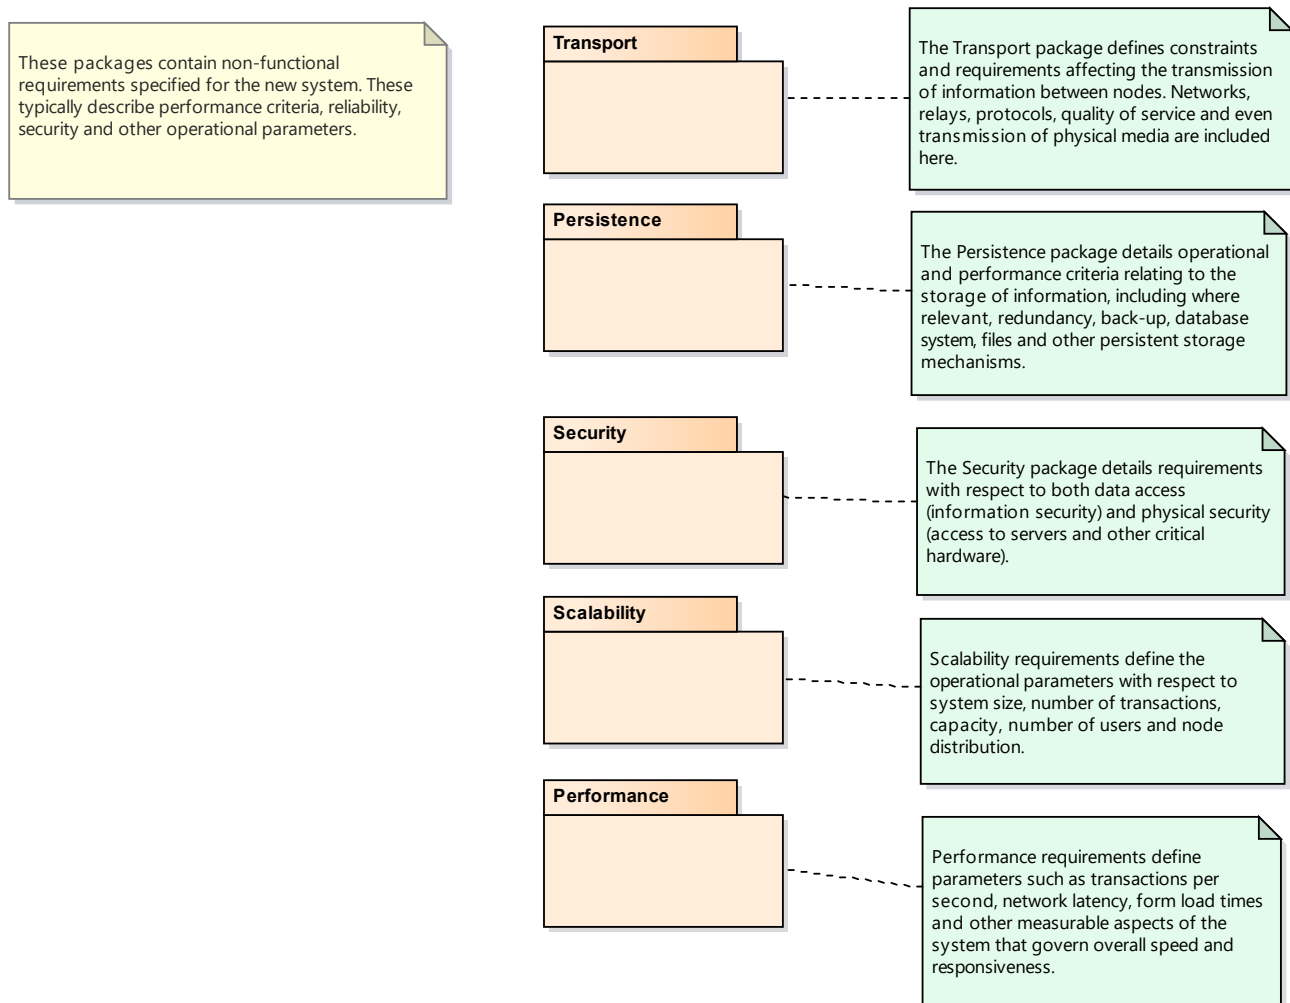

Figure 2: Non-Functional Requirements

<anonymous>*Note in package 'Non-Functional Requirements'*

Performance requirements define parameters such as transactions per second, network latency, form load times and other measurable aspects of the system that govern overall speed and responsiveness.

<anonymous>

Version 1.0 Phase 1.0 Proposed
created on 21/10/2015. Last modified 21/10/2015

Extends

<anonymous>*Note in package 'Non-Functional Requirements'*

Scalability requirements define the operational parameters with respect to system size, number of transactions, capacity, number of users and node distribution.

<anonymous>

Version 1.0 Phase 1.0 Proposed
created on 21/10/2015. Last modified 21/10/2015

Extends
